MSB 21 – Fall 2019 "The Social Life of Genes" 5 pts (class preparation)

Student Name: _____ Due: Monday, September 18

Directions: The following questions refer to the article, "The Social Life of Genes" by David Dobric (pg. 13-34 in *The Best American Science and Nature Writing of 2014*). Be sure to read the questions first so that you'll know what to be looking for as you read the article. Your answers should be directly typed into this document, printed out, and then brought to class.

- As you read "The Social Life of Genes", list any new terminology with which you are unfamiliar. Write a definition, in your own words, for each term using information from the article or if needed, a dictionary.
- In your own words, write a brief summary of the article "The Social Life of Genes". Your summary should focus on what you thought were the most important ideas/themes in the reading.
- Briefly describe any impact the article had on you. For example: Did it speak to you personally? Did you learn anything new? Did it cause you to rethink any ideas you might have?
- What questions do you still have after reading the article? Was there anything you didn't understand or would like to understand better?

"Hat "Hat es Ihnen gefallen, sagen Sie es weiter..... hat es Ihnen nicht gefallen, sagen Sie es uns!"" Wir freuen uns Æ¼Åber Lob und nehmen auch jegliche Kritik an. Wir freuen uns Æ¼Åber einen Eintrag AirMagnet SurveyeÅÅAs simultaneous wireless site surveying capability leverages multiple adapters plugged into the same PC to provide users with a solution to emulate real-world client behavior (using active and iPerf surveys) çAAA reducing site surveying time, effort and cutting costs by half as users only have to walk the floor once to collect all required data. With this wireless 802.11 site survey tool, users can create çAAAwhat-ifçAAA scenarios to simulate a variety of changes to the network and preview the impacts. This includes changing AP transmit power, channel, SSID settings or the addition of additional APs. AirMagnet Survey empowers users with an automated channel plan for APs that avoids interference and over-allocation. With the combination of GPS support and integration with Google Earth, AirMagnet Survey PRO provides a clear path to fast, fully-automated outdoor wireless site surveys. Users can leverage their NMEA-compliant GPS device to automatically collect outdoor wireless data. Users can import street maps of any city in the world, allowing results to be analyzed in the AirMagnet Survey user interface or exported into Google Earth for a zoomed-in view to any street within the city. Before making any design and deployment decisions, it is important to account for RF interference from non Wi-Fi devices. Users who own AirMagnet Spectrum XT can collect both Wi-Fi and spectrum analysis data in a single survey. With this integration, users can visualize the RF energy at any location and identify and display the presence of non-802.11 devices interfering with the WLAN. AirMagnet Survey addresses challenges faced Network installers and staff it during the distribution of vowlan networks and authorize them to an integrated voice preparation verification system that allows users to ensure that their network design is in line with the recommendations of the phone provider. also allows them to perform voice surveys of the real world. with this unique survey ability, users can validate and track the quality of phone calls, capacity and other specific voice parameters in each location on a floor map, to help identify and minimize problems. number of aircraft carriers and air carriers available in the United States and Canada only AM/A1580 airmagnet survey Pro/Planner and spectrum xt bundles airmagnet survey supports two categories of wireless adapters: 1. Favorite adapters: these adapters have been thoroughly tested by airmagnet and are for use with AirMagnet Prover Pro Pro. . Drivers have been customized for extended functionality support. Click here to learn more. 2. Other adapters: these adapters can be used with AirMagnet Survey Pro but have not been tested by AirMagnet. Drivers have not been provide limited functionality and could provide imprecise data. Note: Netally is not responsible for the quality of the test results collected using Wi-Fi adapters not included in the favorite category. Authenticity supported by various adapters could be limited by their skills, zero wireless Windows configurations and various other reasons. Laptop/PC notebook/Tablet PC operating systems: Microsoft Windows 8 Pro/Enterprise 64-Bit, Microsoft Windows 8.1 Pro/Enterprise 64-Bit, Microsoft Windows 10 Pro/Enterprise 64-bit. Optional: an AirMagnet Spectrum XT adapter and license (required for viewing the data and heat map data: only survey pro) a site map in a format supported by AirMant Survey (supported formats are: bmp, .dib, .dwg, .dxf, .emf, .gif, .vsd, .jpg, .wmf, .vxd, or .png) Google Earth must be installed in order to export GPS data for outdoor investigations on Google Earth (only suggestion PRO) Supported GPS device. Here is a list of GPS devices that have been approved for use with the AirMagnet Survey product.
